Growing Season Notes

A wet start to the growing season set the vineyard up with a strong start. The hot beginning to summer created the perfect growing season across the region. With an abundance of blossoms, bird pressure was low allowing for early precision canopy and crop management. This gave the fruit optimal opportunity to achieve flavour before being harvested.

Vineyard Information

| Soil Type: | Lateritic gravel/loam |
|------------------|--|
| Orientation: | North-South facing |
| Pruning Method: | Cane pruned |
